Fish Sampling of Lamprey River 2008

Abstract: These data consist of sampling conducted by the NH Fish and Game Department, NH Department of Environmental Services Biomonitoring Program, and US Forest Service and is current through the 2008 field season. Because of gear selectivity and a variety of sampling objectives, these data should be used primarily to express species presence and not necessarily species absence.

lower Lamprey River	middle Lamprey River
Atlantic salmon	creek chub
alewife	pumpkinseed
pumpkinseed	fallfish
fallfish	eastern brook trout (historic occurrence)
eastern brook trout	black crappie
banded sunfish	eastern brook trout
brown trout	golden shiner
chain pickerel	largemouth bass
smallmouth bass	yellow perch
common white sucker	blacknose dace
yellow bullhead	longnose dace
rainbow trout	northern pike
redbreast sunfish	rainbow trout
American eel	redbreast sunfish
bluegill	American eel
common shiner	bluegill
banded sunfish	common shiner
bridle shiner	bridle shiner
redfin pickerel	swamp darter
golden shiner	brown trout
largemouth bass	chain pickerel
yellow perch	spottail shiner
	brown bullhead
	creek chub sucker
	smallmouth bass
	common white sucker
	yellow bullhead
